MOTORHOME WINTERIZATION

All motorhomes **MUST** be winterized if traveling in freezing conditions. This includes the water pipes, toilet, fresh water tanks, sinks, shower, external shower, hot water heater and holding tanks. Winterization requires that the water be drained from the fresh water tank, hot water heater and both waste tanks. Once the vehicle is winterized, no water can be put into the fresh water tank and it **CANNOT** be hooked up to the city water supply. Therefore, **NO** water is available in the motorhome. The toilet can be used if RV non-toxic antifreeze or similar liquid is used to manually rinse and flush.

Vehicles picked-up at the DEN and NYC locations are always winterized between November 1st and March 31st. Depending on weather conditions this period may be longer. Vehicles out of other rental locations may be winterized as well, depending on outside temperatures.

It is the renter's responsibility to have the vehicle winterized while on a trip at his/her own expense should the weather conditions require it. The renter is also financially responsible for having the vehicle re-winterized on the return trip if the vehicle was winterized at the time of pick up.

US \$100.00 re-winterization will be charged by Road Bear RV if the vehicle is returned non-winterized regardless of the outside temperatures. The renter will be fully responsible for any damages to the plumbing- and water systems caused by freezing during his/her trip.
